

IPL Analysis Dashboard – Power BI

This **IPL Analysis Dashboard** provides deep insights into batting and bowling stats, match trends, and team performances. Built using **Power BI**, it offers interactive visualizations to analyze key metrics and uncover patterns in IPL history.

Key Features

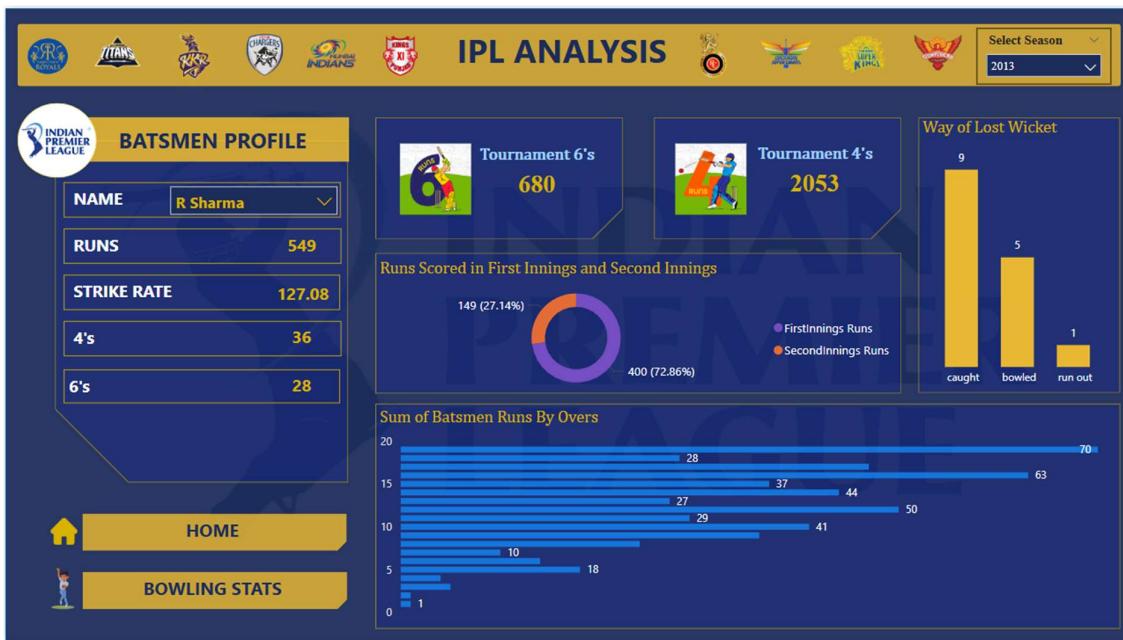

1. Home Page

- Provides an **overview of IPL match trends** and key stats
- Highlights **top-performing teams and players**
- Interactive filters for exploring specific seasons

2. Batting Stats Page

- Displays **top batsmen** based on runs, strike rates, and centuries
- Analyzes **partnerships, boundaries, and run rates**
- Allows users to filter by **season, or player**

3. Bowling Stats Page

- Showcases **top bowlers** based on wickets, economy rate, and average
- Includes insights into **best bowling performances and strike rates**
- Interactive visuals for comparing bowlers across seasons

Technologies Used

-  **Power BI** – Data visualization
-  **Excel/CSV** – Data storage and preprocessing
